OBJECTIVE

I am a 3rd Year Computer Engineering and Computer Science UCT student. I am looking to apply my 2 years of experience, not only as a Computer Science Undergraduate student, but also as a Software Engineer intern, to help with Front end Web development (HTML, JavaScript, CSS).

EDUCATION

Paul Pietersburg Primary School, KZN.

- School choir member.
- Played rugby, U12 B-team

Domino Servite Private School

- Played Soccer, U19 A-team
- Selected as Prefect
- Matriculated with 3 distinctions

University Of Cape Town

- BSc in Computer Science and Computer Engineering (2020 – 2023)

EXPERIENCE

March 2021 – June 2021

Computer Science Tutor • UCT

I tutored a Computer Science course, CSC1015F, which is an introductory course to Python for first years.

August 2021 – November 2021

University House Academic Representative • UCT

My responsibility was ensuring that the fellow students had access to resources that could boost their Academic performance.

Dec 2021 – Jan 2022

Software Engineer Virtual Internship • JP Morgan Chase & Co.

I built a web application that displays a graph for traders. The graph gets continuously updated according to the ratio of the ask price to the bid price of the stock. Thus, python was used for the backend server, to send http requests to the graph in the browser. The React framework was used to display the graph.
